

## AW2400 OS software version up manual<USB>

### System Requirement

Your computer should be higher than the following system requirement.

OS : Windows XP Professional/Home Edition SP1 or higher

Mac OS X **10.4 or higher**(\*)

Connection : USB 2.0(USB 1.1 is also available)

(\*)If you use Mac OS 10.3, set the cluster size to 32K.

Select the 64K cluster size for max speed if you use Windows or Mac OSX10.4 or higher.

When the AW2400 is shipped from the factory, the cluster size is set to 64K.

**CAUTION**) If you format the HDD to the 32K cluster size,

all the data in the HDD will be removed.

Don't forget to making back the data up to the CD-R.

The other requirements

USB cable( in case of USB2.0, use the USB2.0 authorized cable)

### How to version up via USB storage

0. Copy the file 'AW2400PG.BIN' to your computer.
1. With connecting AW2400 and your computer, turn on the power of AW2400.  
(The power of your computer should be turned on.)
2. Make your AW2400 be USB storage mode( please refer the owners manual)
3. After confirming the mounting the HDD of AW2400,  
copy the latest OS file( AW2400PG.BIN) to the route directory of "AW2400-1" drive.
4. After completing the copy, detach the HDD of AW2400 from your computer.  
And please move from the USB storage mode.
